

Services Specialization Partners meeting our criteria below are recognized as **Silver, Gold or Platinum** Delivery Partners.

We have Okta use case based sub-specializations in Workforce, Okta Access Gateway, and Customer Identity Access Management. We also recognize Services Delivery Partners who provide deployment services to our Non-Profit customers through the Okta For Good (O4G) Specialization.

These designations allow our partners to distinguish their company's focus areas within the Okta ecosystem and to promote themselves as trusted partners with a shared dedication towards delivery excellence and customer success.
