

# oktane22 Sponsors

Our team at accSenSe has been focused on building the largest OKTA integration company in one of the most challenging markets and ecosystems in the last few years – the Israeli high-tech niche.

After running through endless Cloud Identity Access Management system implementation use-cases and disasters, the accSenSe team decided to solve the most significant problem of modern organizations relying on SaaS solutions.

We developed a platform to manage and protect cloud Identity and Access Management systems to ensure business as usual isn't just a phrase.

Glean searches across all your company's apps to help you find exactly what you need and discover the things you should know. Its powerful unified search understands who you are, to instantly deliver highly personalized results. It surfaces knowledge and makes connections with the people who can help—making it easier for you and your team to get big things done. Glean takes <2 hours for setup, and doesn't require any engineering talent for implementation. Glean is led by Arvind Jain (Google, Co-Founder of Rubrik), T.R. Vishwanath (Microsoft, Facebook), Tony Gentilcore (Google), and Piyush Prahladka (Google, Uber), with funding from General Catalyst, Lightspeed Venture Partners, Kleiner Perkins, and The Slack Fund.

BOOTH EE5

WEBSITE 

HYPR fixes the way the world logs in. HYPR's True Passwordless(TM) MFA platform decouples authentication from the organization's identity providers and eliminates the traditional trade-off between security and user experience by providing uncompromising assurance and consumer-grade experience. HYPR is trusted by more than 60 million users worldwide, including two of the top four US banks and a Fortune 10 healthcare company. By eliminating the password and deployments taking hours rather than weeks or months, organizations decrease the risk of a cyber attack, increase positive user experience, and lower operational costs.

WEBSITE 

Material Security uses ubiquitous tools in unexpected ways to understand and mitigate risk in cloud office apps. Material is known and loved in the security community for protecting cloud email at global media and financial conglomerates, large tech companies, and highly-targeted public sector organizations. The platform connects in minutes to Microsoft and Google environments to analyze risk, detect threats, automatically investigate incidents, and crowdsource mitigation with end-users via novel integrations with identity providers like Okta, Duo, Ping, and Microsoft Azure AD. The company was started in response to the 2016 Election hacks, is backed by Andreessen Horowitz, and was recently valued at \$1.1B. Material is single-tenant, can be deployed in the customer's cloud, and Material personnel do not need access to customer data. Material also protects the personal accounts of high-risk VIPs.
