Okta Education Services

Inbound Federation: Using Okta as Service Provider

WHO SHOULD ATTEND

- Experienced Okta Administrators
- Technical Architects

PREREQUISITES

- Experience with Okta Administration
- Basic understanding of Identity and Access Management (IAM)

FORMAT

- Instructor-led with hands-on labs
- Duration: 1 day
- Delivery: Virtual (public or private); Onsite (private)

SETUP REQUIREMENTS

- Students use their own computers.
- Okta provides access to an Okta tenant + virtual machine to complete the labs.

Setting up federation with an existing identity service can take a tremendous amount of time and energy, especially at scale. In this 1-day instructor-led course, you will learn how to use the Okta Identity Cloud to secure your connections with standards-based federation to any number of identity providers, negotiating variety across implementations and managing trust.

This course provides experience with org-to-org and Hub-and-Spoke scenarios. You'll learn how an external IdP connects to Okta, where Okta acts as the Service Provider using SAML JIT for federation. You'll explore ADFS and how an Okta org is connected to another org using the Org2Org app, where we set up a Hub and Spoke configuration using SAML and API Provisioning (LCM). You'll also dive into IdP discovery, where the user is routed to their IdP based on different routing conditions.

LEARN HOW TO:

- Describe the Identity Providers integrations supported by Okta and when to use them.
- Integrate Okta with external SAML Identity Providers.
- Implement real-time user creation (Just in Time provisioning) during federation.
- Customize the Okta login to address scenarios with multiple identity providers (IdP discovery).

Inbound Federation: Using Okta as Service Provider

okta

Okta Education Services

COURSE OUTLINE

MODULE 1:
Configure Enterprise Inbound Federation

- Scope the business requirements
- Describe the Okta solutions
- Configure Inbound Federation

MODULE 2:
Configure Federation between Okta orgs

- Scope the business requirements
- Describe the Okta org2org Federation
- Configure org2org federation

MODULE 3:
Configure IdP Discovery

- IdP Discovery Overview
- IdP Routing Rules (Evaluation Criteria)
- Configure IdP Discovery

ABOUT OKTA

Okta is the foundation for secure connections between people and technology. By harnessing the power of the cloud, Okta allows people to access applications on any device at any time, while still enforcing strong security protections. It integrates directly with an organization's existing directories and identity systems, as well as 4,000+ applications. Because Okta runs on an integrated platform, organizations can implement the service quickly at large scale and low total cost.

More than 2,000 customers, including Adobe, Allergan, Chiquita, LinkedIn, MGM Resorts International, and Western Union, trust Okta to help their organizations work faster, boost revenue, and stay secure.
