

# Okta + CrowdStrike:

## Integrated Identity Threat Protection

### Stronger, Smarter Defense with Shared Risk Intelligence

Okta and CrowdStrike combine identity and endpoint intelligence to detect, respond to, and prevent identity-based attacks in real-time. Together with Identity Threat Protection with Okta AI (ITP), the platforms deliver adaptive, risk-based decisions and automated response actions to stop threats before they escalate.

#### Integration via Okta Verify + CrowdStrike Device Risk

##### Integration point

CrowdStrike Falcon® Insight XDR → Okta ITP

##### How it works

Okta Verify ingests device posture signals from CrowdStrike Falcon® Insight XDR (via Zero Trust Assessment score).

- Post-authentication, any change in device risk detected by CrowdStrike is continuously sent to Okta
- Okta ITP re-evaluates sign-on policies based on these signals
- Based on risk, Okta can block access, revoke sessions, or prompt for step-up MFA

#### Integration via Risk Signal Sharing

##### Integration point

CrowdStrike Falcon® Next-Gen SIEM → Okta ITP

##### How it works

CrowdStrike Falcon® Next-Gen SIEM detects identity-based threats and sends real-time user risk signals to Okta.

- Automatically revokes sessions in Okta and downstream apps using Universal Logout
- Enforces policies in Okta like step-up authentication or access blocks
- Customers can also run custom Workflows

#### Customer Benefits

- **Accelerated Threat Response:** Real-time detection and automated actions reduce mean time to respond (MTTR).
- **Stronger Zero Trust Enforcement:** Access decisions reflect up-to-the-minute risk from both identity and device posture.
- **Improved User Experience:** Low-friction access for trusted users, with step-up authentication only when needed.
- **Streamlined SOC Workflows:** Unified signals across identity and endpoint reduce alert fatigue and improve efficiency.
- **Reduced Risk of Lateral Movement:** Coordinated enforcement stops compromised accounts before they move through the environment.
- **Built for Regulated Environments:** FedRAMP authorization across ITP and CrowdStrike Falcon® platform make them easier for public sector and regulated industries to adopt.

#### About Okta

Okta, Inc. is The World's Identity Company™. We secure identity, so everyone is free to safely use any technology. Our customer and workforce solutions empower businesses and developers to use the power of identity to drive security, efficiencies, and success. Learn why the world's leading brands trust Okta at [okta.com](https://okta.com).
