Definition of Key Terms

Okta certification life cycle phases
Certification Program Handbook

**Introduction**

This Handbook sets forth the policies and procedure that apply to all credentials offered by the Okta Certification Program. By taking an Okta exam, you acknowledge and agree to abide by the terms and rules described in the Okta Certification Program Agreement, in this Handbook, and as described on the Okta Training and Certification website.

**Why get certified?**

**Value**

Okta Certification is a Program for IT professionals to validate their knowledge and skills through examination. Okta certifications are granted to individuals, not companies, and establish baseline ability standards for persons who administer, implement, develop, and architect identity and security solutions using the Okta service.

Certifications distinguish the holder of the credential in the market and can be used to advance professional career goals. Companies can use certification to improve competitive advantage by managing employee skill development and more easily recruiting new talent with formally validated skill sets.

**Benefits**

Okta certifications demonstrate commitment to success and provide benefits for the individual and company alike.

Individuals should consider becoming Okta certified to:

- Gain confidence and industry recognition for your skill set
- Demonstrate expertise working with Okta identity management and security solutions
- Improve your performance and grow your professional opportunity
- Distinguish yourself and add new value in the workplace
- Earn a portable credential to enhance job mobility
• Join an elite group of IT professionals who value life-long learning and career development.

Companies that endorse Okta certification also realize benefits, including:

• Ability to evaluate your staff’s skills and knowledge against a recognized benchmark
• Increased productivity
• Assurance that your staff is providing comprehensive quality support to your user population
• Protection of your Okta investment through validation of staff capabilities
• Improved ROI through accelerated knowledge and adoption of new features
• Ability to easily distinguish qualified candidates in recruiting new talent to your organization

Role-based credentials

Okta certifications are role-based and designed to set baseline skill standards for key technical personnel involved in implementing or managing an Okta instance. Credentials are earned by passing an Okta certification exam, series of exams, or by fulfilling other performance-based activities.

Target credentials for inclusion in the program include:

• Okta Certified Professional
• Okta Certified Administrator
• Okta Certified Consultant

Okta Certified Professional
The Okta Certified Professional KNOWS Okta. They possess knowledge about secure identity management and mobility concepts. They have hands-on experience completing day-to-day operational tasks to support users of the Okta service. Professionals have familiarity with Okta technology and processes related to simple directory integration, single-sign on federation, and application provisioning aspects of User Life Cycle Management.
Okta Certified Administrator
The Okta Certified Administrator MANAGES Okta. They are technically proficient at managing the Okta service. They have extensive knowledge about how Okta enables advanced User Lifecycle Management scenarios involving mobile devices, security policy frameworks, supported SSO options, and advanced directory integration for cloud and on premise access. Administrators use the Okta Policy framework to control user access, understand how to map identity attributes and data transformations using Universal Directory, and troubleshoot issues.

Okta Certified Consultant
The Certified Consultant IMPLEMENTS Okta. They are technically proficient at implementing the Okta service in a variety of configurations. Consultants have experience integrating common applications, such as, Office 365, G Suite, Box, and Salesforce with Okta. They also have extensive knowledge and experience scoping and implementing complex Okta integrations involving multi-forest and multi-domain environments, advanced single sign-on (SSO), and inbound federation with Okta. Consultants have working knowledge of Okta APIs and custom configuration options.

Detailed descriptions of candidate qualifications, exam blueprints, and recommended preparation methods are found in associated exam study guides.
Taking the exam

Certification exams are administered and proctored by Examity®. Okta has partnered with Examity, a secure online proctoring service, to protect the integrity of certification exams. Online proctoring means that exams can be taken from most any location at a time that is convenient for you, without travel to a test center. Okta may, at its sole discretion, opt to hold in-person testing sessions.

Read the Examity User Guide for descriptions of the test registration and test taking experience.

Eligibility

To be eligible to register for and take an exam, a candidate must be:

- At least eighteen (18) years of age or have a parent or guardian co-sign our Minor Parent-Guardian signature form downloadable [here](#).
- Must not have been banned from participation in the Program

Registering

Create a user profile on the Examity site at [https://prod.examity.com/OKTA/](https://prod.examity.com/OKTA/). Provide your name, company name, email address, phone number, and a current headshot photograph (not an ID).

**NOTE:** Okta does not require the upload of any form of legal identification, such as driver’s license, passport or another government issued ID. You will be required to present formal identification as part of the exam authentication process on the day of your test, but to safeguard against unauthorized access to sensitive test taker credentials, government issued IDs are not recorded or stored in user profiles for Okta certification exams.

The following registration conduct is strictly prohibited:

- Providing false or misleading information about your identity or that of any other person
- Registering for or taking an Okta exam with another individual’s Examity login
- Allowing someone else to register for or take and Okta exam with your Examity login
- Creating multiple Examity site profiles
- Holding multiple exam registrations at the same time under different Examity logins
Fees, cancellations, and reschedules

Examity manages exam scheduling and payment, rescheduling, and cancellation for all Okta certification exams, and you must initiate these actions through the Examity system. The Okta Certified Professional and Okta Certified Administrator Exams are priced at $250 USD each. The Okta Certified Consultant Exam is priced at $300 USD. The retake price for the Okta Certified Professional, Okta Certified Administrator, and Okta Certified Consultant Exams is $100 USD each, for each subsequent attempt, representing significant retake discounts of $150 USD to $200 USD. Payment for an Okta exam is made during the scheduling of an appointment and can be done using a credit/debit card or an exam voucher. If cancellation becomes necessary, refunds can be given only if the cancellation policy was adhered to and they will only be granted to the original credit card utilized during the appointment process.

- You must register for an exam at least 24 hours prior to your desired appointment time
- You may reschedule or cancel an appointment up to 24 hours prior to exam start time
- You may not reschedule or cancel an exam appointment once it has started
- If you do not complete the exam at the scheduled time and did not contact Examity 24 hours in advance to cancel or reschedule, you will be charged the full exam fee

Special Accommodation: Please contact us at certification@okta.com at least 30 days before the date you would like to take the exam to request an accommodation.

Scoring and results

Cut scores: Exam passing thresholds are set independently using statistical analysis and input from Okta experts and independent psychometricians. Okta reviews, updates, and adjusts exam questions on an ongoing basis as items are updated or refreshed and to ensure item accuracy based upon Okta feature enhancements. For this reason, Okta discloses exam results as Pass or Fail only and does not publish cut-scores.

Exam result: a pass/fail exam result will be sent to you via email within ten (10) days of taking your exam. Once all published requirements are met, you will earn the certification credential and be authorized to use the certification title and logo on your business cards and other professional collateral.

Indeterminate results: Okta regularly monitors the performance of all exams to ensure the validity of results and fairness to all test takers. During the monitoring of exam performance, Okta may classify scores as indeterminate. Indeterminate results are not considered valid and
will not be eligible for certification. Okta will allow candidates whose results are indeterminate the option of retaking the exam at no cost. If it is determined that a breach of the Program Agreement or any policies described in the Handbook has contributed to the classification of indeterminate, Okta will take additional action as laid out in the Program Agreement.

**Candidate retesting:** Okta reserves the right to ask any candidate to re-test if there is any suspicion of fraudulent or aberrant test scores.

**Appeals:** A candidate has the right to appeal their exam results. When an appeal is requested in writing, Okta will review the candidate’s results to determine if any mistakes were made in the determination of their score results.

**Scored & unscored questions:** Your exam may contain unscored questions in addition to the scored questions, to the total number of questions that are presented to you may be greater than the number shown on the exam page. This is standard testing practice. You will not know which questions are unscored. If your exam contains unscored questions, the time allowed for the exam takes into consideration the time you will need to answer all questions and review your work. Your exam results will reflect your performance on the scored questions only.

**Retakes**

Rules governing retake are in place to protect the integrity of exam content and allow the candidate additional time to prepare after a failed attempt. Exam retakes are subject to the following conditions:

- A candidate for certification can retake a failed exam 24 hours after his or her first failed attempt
- A candidate must wait 14 days after each subsequent failed attempt prior to retaking a failed exam
- Candidates may only take beta exams one (1) time
- Candidates may not retake passed exams
- Exam fees must be paid for each attempt and will not be refunded for a failed exam
- The exam fees to retake an Okta certification exam is $100 USD for each retake attempt

Violation of the retake policy in any way, including, but not limited to, retaking an exam prior to the designated waiting period or registering for the exam using false credentials may result in exam results being invalidated. A test result found to be in violation of the retake policy will be marked invalid, which will result in no credit awarded for the test taken. Repeat violators will be banned from participation in the Okta Certification Program.
Test taking rules

To ensure the accuracy and validity of test scores, the following rules must be followed through the entire period that you are taking your proctored exam. Violation of any of these rules may result in the suspension and possibly the cancelling of your exam:

- The test surface must be clutter free and contain only one computer monitor or screen, one keyboard, and one mouse. Dual monitors or screens are not permitted.
- No food or beverages are allowed in the testing area.
- No phone, calculators, or other electronic devices on the test.
- No notes, study materials, books, or access to other websites is allowed during the exam.
- Do not wear jackets, hoodies, hats, ties or scarves when taking the exam.
- You must be alone in the room with no additional person.
- You may not talk to anyone during the exam; this includes answering the phone.
- You must remain seated for the duration of the test and may not leave the room for any reason, including using the restroom.
- Proctors are authorized to pause your exam at any time upon detecting testing irregularity. They may also stop your exam, which means that it will be considered null and void.

Policies

Certification program agreement

The Okta Certification Program Agreement ("Agreement") sets forth the terms and conditions that govern your participation in the Program. It is critical that you read the agreement in advance of registering for an exam, as you will not be permitted to register for or take any Okta Certification Program exam without agreeing to the terms. The Agreement will appear before you can start your exam on test day and failure to accept these terms will mean that you will be unable to take the test and you will not receive a refund. The rights granted to you under the Agreement are not in effect until you successfully pass the exam and otherwise fulfill stated requirements for certification or recertification.

Violation of any terms in the Agreement can prohibit you from taking the exam, invalidate your score, suspend or revoke your certification, or ban you from the Program.
Certification candidate code of conduct

No candidates will participate in any cheating, breach of security, misconduct, or any actions that will compromise the integrity or confidentiality of an Okta examination or otherwise compromise the integrity or confidentiality of Okta’s certification programs. Such behaviors include, but are not limited to, the following:

- Making public the questions, answers, or any of the content of an exam with any person, without prior written approval from Okta
- Discussing exam content prior to or following an examination, without prior written approval from Okta
- Obtaining or making a copy of an Okta exam (by any means including reconstruction through memorization), advertising, selling, and/or distributing actual exam content by any means including web postings, discussion forums, chat rooms, study guides, etc.
- Using unauthorized preparation materials (examples of which include, but are not limited to, “brain-dump” materials, actual exam questions, and other unauthorized published exam content) prior to or during an exam
- Providing falsified documentation as means of providing false identity or false address information when registering or taking an exam, including impersonating another candidate or soliciting someone to take an exam on your behalf
- Using falsified or altered certificates, score reports or other documents or electronic media to misrepresent certification status
- Altering or tampering with the testing equipment for the purposes of gaining an unfair advantage on an Okta certification exam
- Giving, receiving, or obtaining assistance of any kind for any Okta exam
- Causing a disturbance or behaving unprofessionally at any testing facility
- Talking or communicating with other exam-takers while testing is in progress
- Breaching the terms of the Okta Exam Retake Policy or Candidate Agreement

Classifying Scores as Indeterminate

Okta monitors the health of all exams to identify violations of the Certification Program Code of Conduct and to ensure the validity of exam results. During the monitoring of exam health, Okta may classify test scores as indeterminate when abnormalities in performance are detected for which there is no satisfactory explanation. A test score may be classified as indeterminate as a
result of a breach in this Code of Conduct or other violations. If a test score is classified as indeterminate, the candidate who holds the affected test score will be advised of options for appealing the decision. Scores classified as indeterminate will not be reported to anyone other than the individuals associated with those scores. Indeterminate test scores will be removed from Okta’s system of records for certifications within 30 calendar days from notice of the violation, unless otherwise specified. If a breach of the Code of Conduct has contributed to the classification of indeterminate results, Okta may also take additional action as described below.

**Notification of Violations of Policy and Possible Sanctions**

If Okta determines that a candidate has violated this Code of Conduct, a notice of the violations and applicable sanctions will be sent to the candidate. A certification candidate flagged for violating the Code of Conduct will have an opportunity to provide relevant information for evaluation to challenge the allegation of violation. It is the candidate's sole responsibility to ensure that your current contact information, including email address, are stored in Okta's systems of record for certification located at [https://prod.examity.com/OKTA/](https://prod.examity.com/OKTA/).

**Appeals Process**

After a candidate has received notice of a violation and the applicable sanctions from Okta, the candidate will have thirty (30) calendar days to file a written request for an appeal pursuant to the Okta Candidate Appeals Process. All appeals must be submitted to certification@okta.com, with the word “Appeal” in the subject of the e-mail.

**Remedies for Violating the Code of Conduct**

Any candidate determined by Okta to have violated the Code of Conduct will be subject, but not limited to, one or more of the following remedies, if determined necessary by Okta as based on the severity of the incident or violation:

- Denial of an Okta certification for the applicable examination for a maximum period of 12 calendar months from the date of such determination
- Indetermination of test score
- Required to retake an examination
- Ineligibility to register and/or schedule ANY Okta examination for a minimum of 6 calendar months
- Any and all other appropriate actions, including legal remedies, that Okta deems necessary and appropriate to enforce this Code of Conduct
Questions Regarding the Candidate Conduct Policy
It is the goal of Okta to ensure certification candidates are aware of the Code of Conduct and the consequences for violating it. If you have questions regarding the Code of Conduct, please submit them to certification@okta.com, with the words “Code of Conduct” in the subject of your e-mail.

Report a Security Incident to Okta
Maintaining the value of Okta’s certifications is a collaborative effort. Individuals with information or evidence indicating violations of these policies are encouraged to submit these incidents to Okta by emailing certification@okta.com.

Recertification policy
The Okta service adds new features and functionality at a rapid rate and certification candidates are expected to keep pace with product enhancements. After you achieve a certification credential, you must meet ongoing requirements to keep credentials current and use Okta certification logos. This may include the completion of specific training, recertification exams, or even sitting for core exams at designated intervals.

Until further notice, below is the requirement for recertification:

Individuals who hold Okta certifications must renew their certifications annually or attain a new higher level Okta certification before the annual anniversary of their highest level Okta certification. To renew one or multiple Okta certifications, a certification holder must pay the annual certification maintenance fee of 100 USD, take an optional self-paced skills update training course, and pass a mandatory unproctored new release exam, or attain a higher level certification by the annual anniversary of his or her highest level Okta certification. Recertifying at the highest level results in the automatic renewal of all lower level certifications.

Below are example scenarios of how recertification works.

**SCENARIO 1:**
John Doe attained his Okta Certified Professional certification on 08/16/2016.
**What must John Doe do to keep his certification current?**

John Does must take the designated skills update training and pass the designated unproctored New Release assessment published on 2/01/2018 no later than 11:59 PM Eastern Time on 05/01/2018 in order to renew his Okta Certified Professional certification. In 2019 and beyond, John Doe must take and pass the designated assessment by 11:59 PM ET on 08/16.

**What happens if John Doe does not take and pass the New Release exam by the deadline?**

The Okta Certification Team will expire John Doe’s Okta Certified Professional certification, rendering his certification invalid.

---

**SCENARIO 2:**

Susan Jones attained her Okta Certified Professional certification on 06/20/2017.

**What must Susan Jones do to keep her certification current?**

Susan Jones must take the designated skills update training and pass the designated unproctored New Release assessment published on 2/01/2018 no later than 11:59 PM Eastern Time on 06/20/2018 in order to renew her Okta Certified Professional certification. In 2019 and beyond, Susan Jones must take and pass the designated assessment by 11:59 PM ET on 06/20.

**What happens if Susan Jones does not take and pass the New Release exam by the deadline?**

The Okta Certification Team will expire Susan Jones’s Okta Certified Professional certification, rendering her certification invalid.

---

**SCENARIO 3:**

Chuck Davis holds the Okta Certified Professional (OCP) and Okta Certified Administrator (OCA) certifications. Chuck attained the OCP certification on 6/12/2017 and the OCA certification on 7/14/2017.

**When should Chuck renew his OCP certification?**

Chuck’s OCP certification is valid as long as his highest level certification, which is his OCA certification, is valid.
How many New Release Assessments must Chuck take in order to keep his OCP and OCA certifications current?

Chuck Davis must take the designated skills update training and pass the designated unproctored New Release assessment for the OCA certification published on 2/01/2018 no later than 11:59 PM Eastern Time on 7/14/2018 in order to renew his OCA certification. Once Chuck renews his OCA certification, his OCP certification will be renewed automatically as well.

You will be notified by Okta regarding the process to pay your certification maintenance fee and timeline for completing recertification activity. That notification will be sent to the email address you provided during exam registration; please ensure your email address is kept up-to-date in the Examity system: [https://prod.examity.com/OKTA/](https://prod.examity.com/OKTA/).

Programs revisions and exam retirement

Okta has, at its sole discretion, the right to revise, replace, or retire certification exams at any time. Program policies, benefits, and requirements may also be revised at any time. Program announcements are communicated on the Okta certification website and will be sent to the email address provided by participants during exam registration. Ensure this email address is kept up to date in the Examity system.

Use of certification logo

Upon completion of the certification requirements, Okta provides candidate access to logos to promote their achievement. Because certification credentials are earned and held by an individual, not a company, logos may be used solely by the certified individual in the following ways:

- On printed or digital business cards
- On personal social media profile, such as LinkedIn
- On websites that profile the certified individual
- On resumes
- In an email signature
- You promise to adhere to logo usage rights and restrictions as governed by the [Okta Certification Program Agreement](https://prod.examity.com/OKTA/).
Clear space

Measurements
Minimum clear space is x, two times the height and width of the “o”. Clear space should be measured from the edges of the circle (see graphic). Always maintain sufficient clear space (at least x) between the logo and any other element.

Horizontal and vertical lockups

Horizontal
If used with text horizontally, center align.

Vertical
If used with text vertically, center align.

Color
Your role-based certification badge is a specific color or colors which represent the official designation that you earned. You may not change the color(s) of your badge.
Data and privacy
Except as otherwise stated in this Handbook or the Certification Program Agreement, Okta’s Privacy Policy covers the collections, use, and disclosure of personal information any time you interact with Okta.

Okta, the testing service provider and other related third party services, may collect, process, and use your data to process Exam Materials and certifications, manage the Program, confirm compliance with the Program Agreement, and market and improve program products, training, and services.

Upon request, Okta Certification team will confirm third party requests for exam and certification status by named individual.

Staying informed
Information about the Okta Certification Program can be found on the Okta Training & Certification website. The most common questions are answered in our online FAQ.

If you have additional questions, contact us at certification@okta.com

Expect the Okta Certification Program to evolve as we keep pace with innovations in the Okta service and add new credentials to the program.

Keep your email address current in the Examity system to receive program announcements.

Definition of Key Terms
Below is a list of definitions of key terms as defined by the Okta Certification Team. These terms are used in other certification collateral. They are presented here to help ensure candidates for Okta certifications have a common understanding of key terminologies frequently used by the Okta Certification Team.

Exam Discontinuation: When an exam is discontinued, that exam is no longer available for purchase. It is also no longer available for delivery. A discontinued exam is removed from production and archived. Candidates for certification can no longer take that exam in pursuit of a certification. Discontinued exams do not impact the certification statuses of current certification holders. Certifications already attained by passing an exam that is discontinued remain valid until the date of expiration of those certifications.
Certification Retirement: When a certification is retired, that certification is no longer attainable. Certifications already awarded remain valid until the expiration date of those certification.

Certification Expiration: When a certification expires, that certification is no longer considered valid. Certifications can expire in two ways, both of which are defined by Okta. A certification can expire based on a preset time limit, for example two years from the date attained or based on a program decision. Or, Okta can choose to forcibly expire an individual certification, certification program, or entire certification track.

Okta will provide the public with ample notice prior to the discontinuation of any exams and the retirement and expiration of any certifications. Discontinued exams, as well as retired and expired certifications, will be listed on the certification web page for a period of 12 months.

Okta certification life cycle phases

The following steps describe the life cycle phases for each Okta certification:

1. Certification program is announced.
2. Certification exam is released to the public.
3. Discontinuation of certification exam is announced three to six months before the discontinuation date.
4. Certification exam is discontinued.
5. Retirement of certification is announced three to six months before the certification is retired. Certification is valid even after the retirement date. Note: In situations where Okta chooses to forcibly expire a certification program, the expiration of the certification will be announced three to six months before the certification is expired.
6. Certification is no longer valid once it has expired.
