The Value of Okta Training

The highest quality education possible.

Your IT staff is your most valuable asset. Their knowledge and skills determine the success of your technologies, which translate into the success of your business. Without a well-trained staff, your organization won't fully reap the benefits of your Okta investment.

We've helped thousands of individuals worldwide get the most out of their Okta internal IT and Platform solutions.

Okta Training puts you on the fast path to success with our extensive collection of live & on-demand training solutions. Join us in our public classes or let us tailor an exclusive private class for your team. Earn a certification credential to promote what you know.

Join other Okta customers (your peers) and let our expert Instructors guide you along the path to success – and more high fives in the hallway! And who knows, maybe we'll ignite a few new ideas that will make you a hero for solving your organization's unique business challenges.

“

*Okta Training puts
you on the fast path
to success*

”

Ways to Train

A variety of delivery methods to fit your learning style.

○○ Hands-on Lab

Accelerate your Okta Administrator and Platform API skills in these live interactive training courses. Get hands-on with Okta, complete lab activities, learn from each other and our expert instructors.

○ Recorded Video (Self-paced)

Recorded product overviews for a self-paced learning experience. This library of free training videos is perfect for learning the basics of Okta at the beginning of your knowledge journey.

○○ Private Class

If you need to train your entire team or department, a Private Class may be right for you. We can deliver our hands-on lab courses at your location or online in a private virtual classroom. We can even create a tailored or customized learning experience for your organization's specific needs.

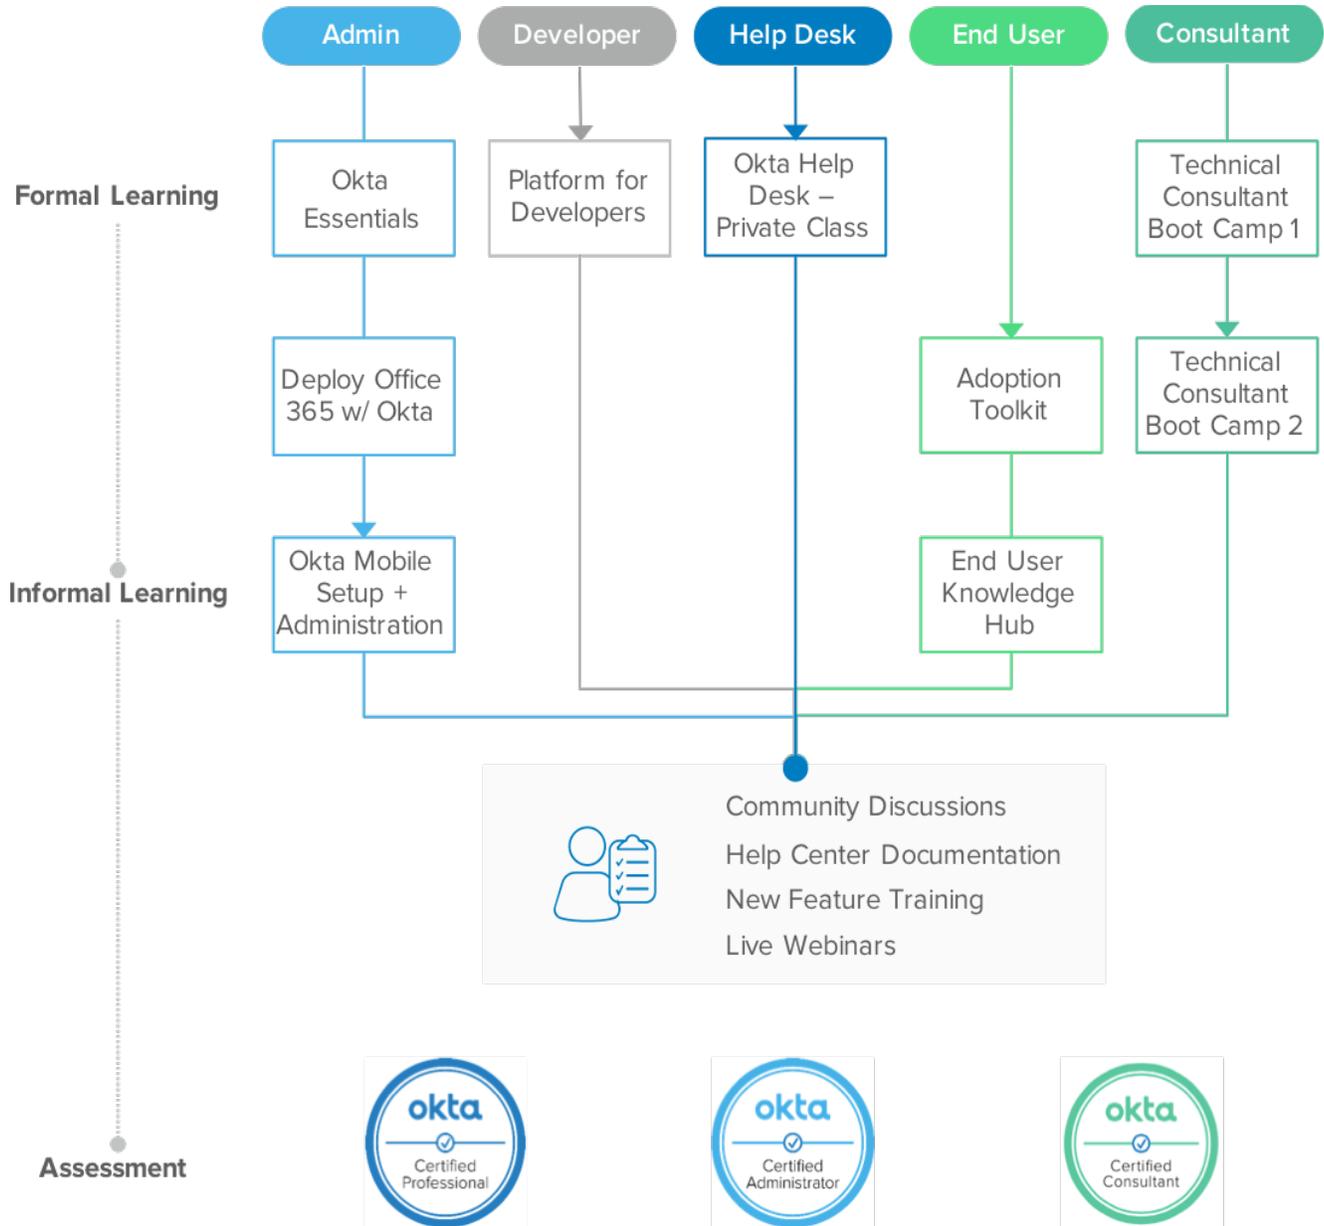

○ Okta Help Center

The Okta Help Center includes an extensive library of training videos and knowledge base articles, available whenever you feel the urge.

Live Virtual ○
On-demand ○

Getting Started Learning Paths

Kickstart your journey as an Okta...

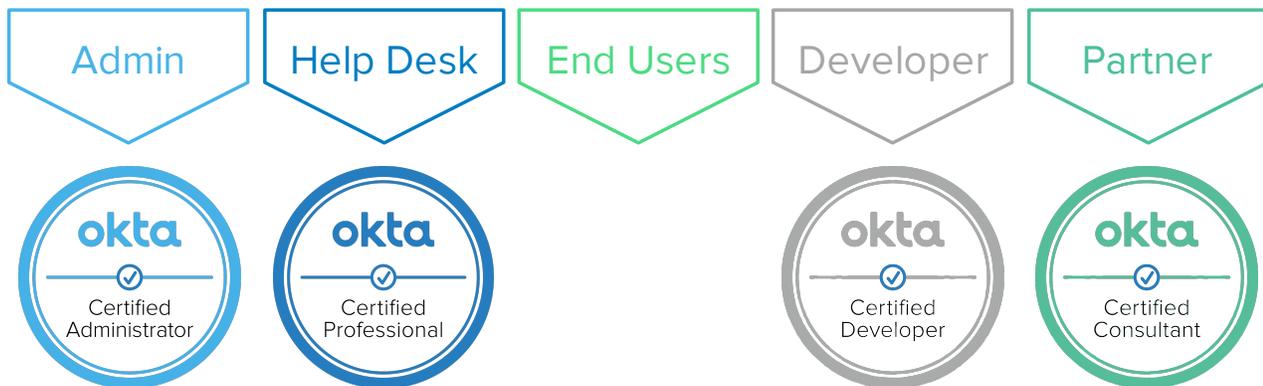

All courses can be delivered privately (onsite or virtually) just for your team.

Getting Certified

Go onward with your Okta education and test your skills.

Okta Certification is a Program for IT professionals to validate their knowledge and skills through examination. Okta certifications demonstrate commitment to success and provide benefits for the individual and company alike.

Okta Certified Professional

Okta Certified Professionals possess knowledge about secure identity management and mobility concepts. They have hands-on experience completing day-to-day operational tasks to support users of the Okta service. They have familiarity with Okta technology and processes related to simple directory integration, single-sign on federation, and application provisioning aspects of User Life Cycle Management.

Okta Certified Administrator

Okta Certified Administrators are technically proficient at managing the Okta service. They have extensive knowledge about how Okta enables advanced User Lifecycle Management scenarios involving mobile devices, security policy frameworks, supported SSO options, and advanced directory integration for cloud and on premise access. Administrators use the Okta Policy framework to control user access, understand how to map identity attributes and data transformations using Universal Directory, and troubleshoot issues.

The Value of Hands-On Training

Practice helps students master skills and succeed.

Prepare your team with realistic product experience in a hands-on lab approach to learning with simulated Okta environments that support lecture and interactive activities.

Maximize potential for developing and retaining the skills and knowledge you need to be successful in your unique job function every day.

Put your team in expert hands with our leading Okta Certified Instructors, delivering curriculum designed by product experts.

Boost confidence in your ability to drive innovation and become a hero within your company.

Deeply engage in your technical education and become even more connected to your professional discipline.

“

“I wish I had taken this class prior to our implementation”

- Barb Adams, GoDaddy

“This class is giving me the information and tools that I need to effectively administer Okta”

- Nicholas Walter, Sunrun

“It’s been great to get hands-on with provisioning, a product that we don’t currently own but that we are looking at”

- Owen Fuller, The Weitz Company

“The interface is intuitive but there are bits and pieces that you definitely need training on to understand further”

- Gary Russell, Kimberly Clark

”
