

## Automated User Provisioning through Deprovisioning— Informed by HR, Enforced by Okta

An HRIS like BambooHR is typically the system of record for employee data, requiring IT departments to rely on timely updates from HR in order to provision accounts and apps, update profiles and deactivate users. This frequently manual process can be inefficient and error-prone, resulting in lost productivity and security risks. As companies grow in size and complexity, and as SaaS apps proliferate, organizations require a safer, more reliable, and more efficient solution for employee lifecycle management.

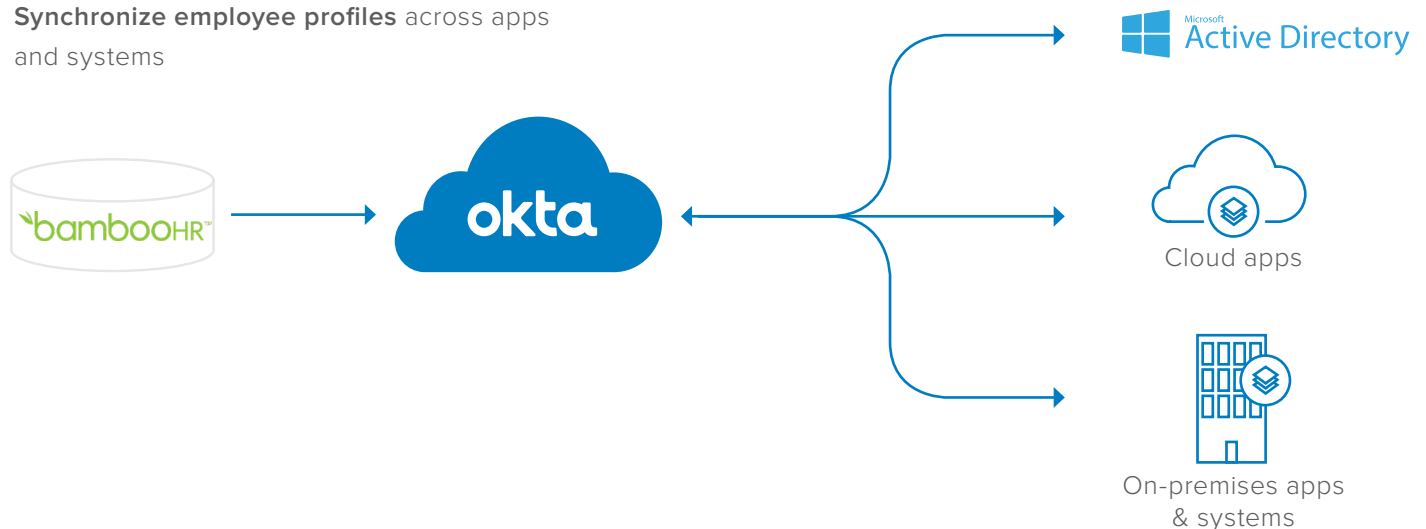

### Solution: Okta + BambooHR

Okta's pre-built integration with BambooHR unifies HR and IT, using employee data and updates in BambooHR to inform the user lifecycle across IT systems, including Active Directory, cloud apps, and on-premises systems.

- **Dynamically update permissions** when employees switch departments, roles, or geographic locations
- **Quickly deprovision** employees when they leave the company, by automatically deactivating users across all downstream apps and systems, including Active Directory

### With this integration, you can...

- **Automate provisioning** by assigning applications to employees based on their group, role, or other attributes in BambooHR
- **Synchronize employee profiles** across apps and systems

## Advanced integration features include:

- **Set a pre-start interval** to get a jump on account setup before an employee's official start date
- **Add additional custom attributes** to a user's BambooHR and Okta profiles

## Okta + BambooHR integrate to provide benefits across your organization:

- **Increase IT efficiency** by automating account and app provisioning and deprovisioning
- **Make new hires productive on day one** by providing immediate access to apps
- **Decrease “rogue account” security risks** when offboarding users, by automatically deactivating all access to apps
- **Improve data accuracy and fidelity** by directly syncing HR + IT systems
- **Reduce HR/IT team friction** by eliminating back-and-forth over data and processes

The Okta integration wizard lets you configure Okta + BambooHR in minutes. Safely onboard and offboard employees, provision and deprovision them instantly and automatically, propagate profile changes reliably across your networks, and save time and money by simplifying the process for your HR and IT teams.

## Customers using Okta + BambooHR include:

“Identity really just flows from our HR tools into Okta and then into everything else—our internal tools, our external tools... It works really well.”

**Aaron Zander**  
Senior IT Administrator, Massdrop
