

Modernize IT

Daniel Lu, Product Marketing

Disclaimer

This presentation contains “forward-looking statements” within the meaning of the “safe harbor” provisions of the Private Securities Litigation Reform Act of 1995, which may include, but are not limited to, statements regarding our financial outlook, product development and market positioning. These forward-looking statements are based on current expectations, estimates, forecasts and projections. Words such as “expect,” “anticipate,” “should,” “believe,” “hope,” “target,” “project,” “goals,” “estimate,” “potential,” “predict,” “may,” “will,” “might,” “could,” “intend,” “shall” and variations of these terms or the negative of these terms and similar expressions are intended to identify these forward-looking statements. Forward-looking statements are subject to a number of risks and uncertainties, many of which involve factors or circumstances that are beyond Okta’s control.

In particular, the following factors, among others, could cause results to differ materially from those expressed or implied by such forward-looking statements: the market for our products may develop more slowly than expected or than it has in the past; quarterly and annual operating results may fluctuate more than expected; variations related to our revenue recognition may cause significant fluctuations in our results of operations and cash flows; assertions by third parties that we violate their intellectual property rights could substantially harm our business; a network or data security incident that allows unauthorized access to our network or data or our customers’ data could harm our reputation, create additional liability and adversely impact our financial results; the risk of interruptions or performance problems, including a service outage, associated with our technology; we face intense competition in our market; weakened global economic conditions may adversely affect our industry; the risk of losing key employees; changes in foreign exchange rates; general political or destabilizing events, including war, conflict or acts of terrorism; and other risks and uncertainties. Past performance is not necessarily indicative of future results. Further information on potential factors that could affect our financial results is included in our Annual Report on Form 10-K for the year ended January 31, 2018 and other filings or reports filed with the Securities and Exchange Commission that are posted at investor.okta.com.

Any unreleased products, features or functionality referenced in this or other presentations, press releases or public statements are not currently available and may not be delivered on time or at all. Product roadmaps do not represent a commitment, obligation or promise to deliver any product, feature or functionality. Customers who purchase our products should make their purchase decisions based upon features that are currently generally available.

The forward-looking statements contained in this presentation represent the Company’s estimates and assumptions only as of the date of this presentation. Okta assumes no obligation and does not intend to update these forward-looking statements whether as a result of new information, future events or otherwise.

This presentation contains estimates and other statistical data that we obtained from industry publications and reports generated by third parties. These data involve a number of assumptions and limitations, and you are cautioned not to give undue weight to such estimates. Okta has not independently verified the statistical and other industry data generated by independent parties and contained in this presentation and, accordingly, Okta cannot guarantee their accuracy or completeness. Expectations, estimates, forecasts and projections are subject to a high degree of uncertainty and risk. Many factors, including those that are beyond Okta’s control, could cause results or outcomes to differ materially from those expressed in the estimates made by the independent parties and by Okta.

The New Realities Facing Modern IT Organization

Cloud Adoption

LOBs are demanding new cloud apps to stay innovative

Mobile Workforce

Employees want easy access to all apps from any location on every device

Outside Collaboration

Outside partners require the same secure and seamless access

API Economy

Developers creating modern applications and tools built on APIs

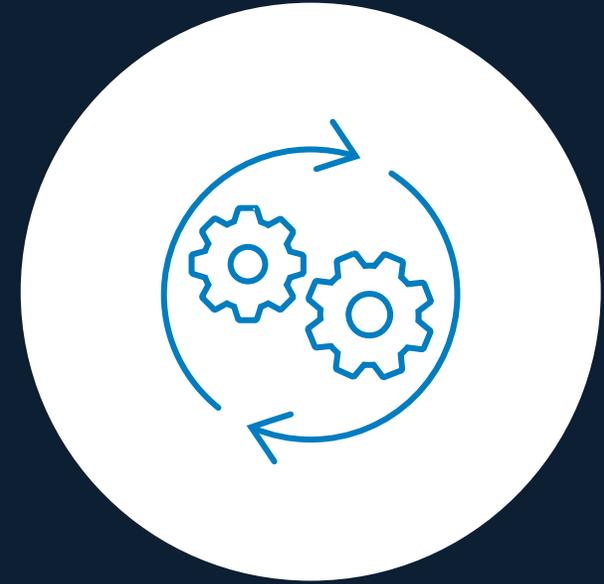

Projects IT Needs to Take On

**Cloud to
Ground App
Access**

**Centralized
Identity
Management**

**Reduce IT
Friction Through
Automation**

Cloud to Ground App Access

Access to all apps from
any device or location

BUT

**Complex, time
consuming, and
expensive**

Centralized Identity Management

**Single view of user
across all apps and
profile sources**

BUT

User attributes are
**spread across
multiple profile
sources**

Reduce IT Friction Through Automation

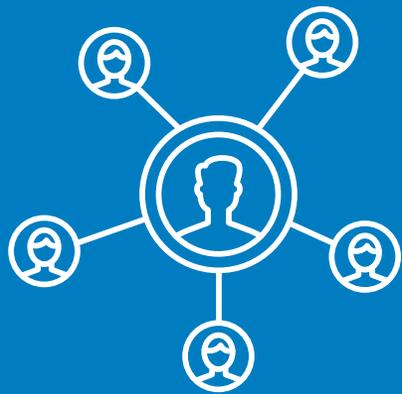

Sophisticated
control of user identities
across lifecycle states with
automation

BUT

Manual, error-prone IT
processes **do not scale**
as access needs grow

LIFE INSURANCE

Okta

The MLC Life Customer Journey

June 20, 2018

Gus D'Onofrio

A new era for MLC Life Insurance

100% NAB owned

Nippon Life's acquires 80% effective 1st October 2016

We participate across all major market segments (except mass market direct).

Instruction to keep the brand but set up our own stand alone operation

Technology and other support functions embedded in the bank

Australia's biggest startup – more than 1,600 employees.

Technology Strategy

MLC Life creates Program Sanagi (Japanese for chrysalis) to stand up its own Technology. The project is split into 26 platforms.

Infrastructure, Network, Security, DevOps and Workplace are defined as enabling platforms and are built from the ground up.

Other platforms are moved across from NAB to the MLC Life environment between 2017 and 2019

Some of the projects we work on include Cloud SSO, automated provisioning, Office 365, etc.

Cloud first mindset / hybrid model

Philosophy

Aiming to create a more dynamic organization, Technology decides not to emulate NAB.

With a base of former NAB users, the hiring focuses on people from more dynamic industries, creating a hybrid culture, where the best idea wins.

The Team grows to 130+ people, focusing on Sanagi and BAU.

Challenges

- Requirement to setup infrastructure within 24 months from day 1
- Need to integrate with a legacy AD
- Flexible and agile integrations, not only with internal platforms but also with B2C platforms – SaaS, etc (via APIs)
- Cost model that could easily scale
- Requirement to get the business to own authorization

How Okta Helped

- Modernizing MLC
 - SSO (MLC embracing cloud applications, Office 365, ServiceNow, FCM Travel Management, Preceda, ZScaler, etc.)
 - RBA (MLC while NAB did not have RBA)
 - Driving efficiencies and pushing the business to own the responsibility
- Governance & Security
 - Strong requirement from the industry on the back of the Royal Commission
 - Okta's compliances & certifications helped drive MLC's costs down
 - MFA (in the process of being rolled out next week) for internal users and 3rd party vendors across different geographies
- Efficiency & Costs
 - Driving costs down while delivering integrations with all required platforms

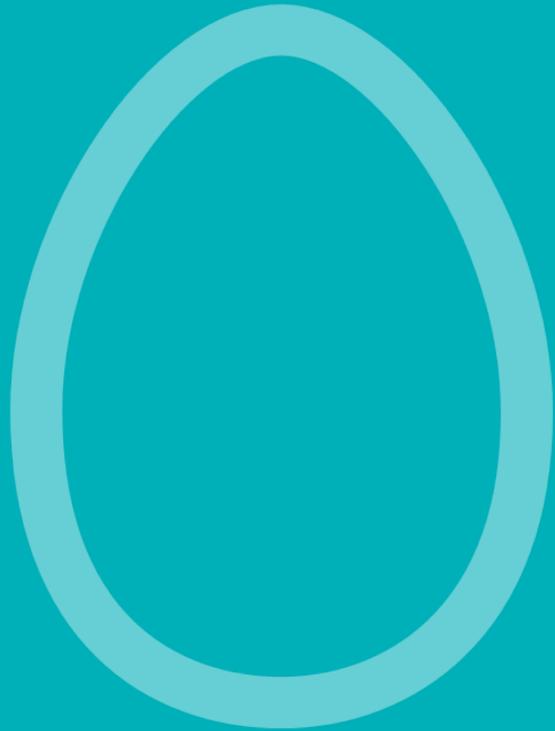

Next steps

- Complete migration of legacy platforms from NAB to MLC Life, integrating all platforms with Okta
- Consolidation of applications
- Onboarding of contractors into Okta, but not into HCM
- Continue slow shift towards public cloud

Lessons learnt

- It's all about the people
 - Choose your delivery partner carefully
 - Get some technically strong internal resources involved
 - Make sure they get proper instruction to absorb knowledge and own the technology in due time
- Manage expectations
 - Integrations may take longer initially, but with time they will be completed faster
 - Make sure your internal Team absorbs the learnings
- Promote your success
 - Business users like SSO. Let them promote this technology for you.

LIFE INSURANCE

Thank you
