Okta Professional Services for the Global Enterprise

1,000s of successful customers. 1,000s of years of identity experience. We've got this.

As you move to the cloud and begin to embrace the Internet of Things, identity and access management plays a critical role in your success. With a solid handle on the identity of every person, device, and connected smart object within your network and beyond, you can manage and secure that increasingly amorphous digital perimeter. But identity management can be an extremely complex matter, when you're talking about a large global organization that includes employees, contractors, partners, customers, and suppliers.

Enterprises today have typically accumulated a patchwork of identity solutions to support various, often siloed, business units. The process of streamlining and integrating all those elements into a unified identity strategy can be wrought with confusion and roadblocks, involving cross-organizational stakeholders with often limited experience with identity or cloud infrastructure.

In any large organization with a history spanning more than a decade, legacy, on-prem infrastructure has dug deep roots, and M&A activity may make things even more complex. When it comes to modernizing your environment, it can be hard to know which thread to pull first. The one thing that everyone agrees on, however, is the need for speed: Modernization needs to be completed…yesterday.

Identity, untangled

Okta was built on a fanatical approach to customer success, and that attitude affects every decision we make. Our Professional Services team stands at the heart of that commitment, with the goal of helping customers identify and engage stakeholders, simplify identity and access management, and get it right for the long term.

Our job is to come in, scope your project, assess your architecture, and offer instruction on everything from product selection to provisioning best practices. Our people, together with our prescriptive, results-oriented methodology, can put your identity project on a road to quick time to value.

> "Okta has always been there for us, for planning, deploying, and supporting our entire team. They are the gold standard of companies we've worked with."

Unbelievably accelerated deployments.
Graceful migrations.
Painless directory consolidations.

With 1,000s of deployments under our belt, we know how to help customers succeed. Our Professional Services team includes identity and access management professionals with an average of 7-8 years in the industry. Our certifications include PMP and PRINCE2 project management, Certified Information Systems Security Professionals (CISSP), and Security++, as well as Level 3 Okta certifications.
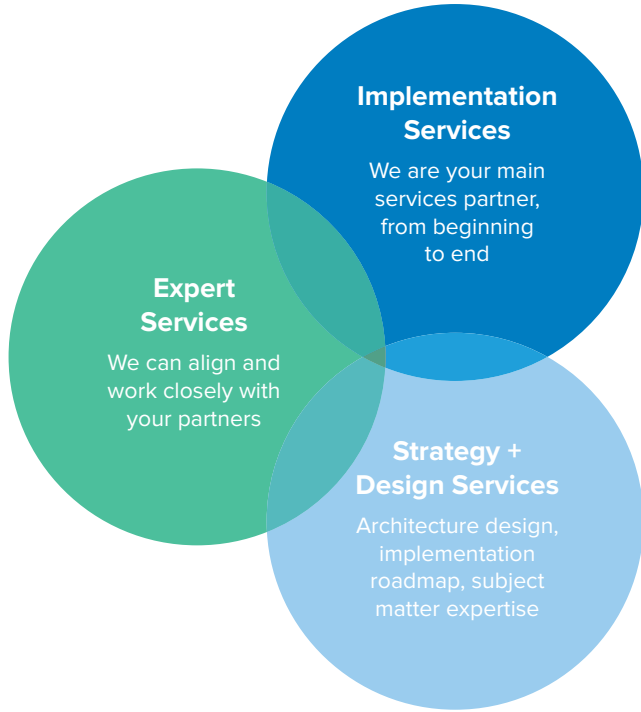

We harness the power of Okta product technology teams to deliver customized integrations when necessary, to get all your apps incorporated into Okta and all your users on board. At Okta Professional Services, we put a lot of energy into preparing your organization for success, helping you establish essential roles, processes, and new ways of thinking, to make sure the technology works optimally in your environment.

What we do

At Okta, we've developed a prescriptive approach for helping customers. Whether you need someone to provide strategic advice, end-to-end services, or knowledge transfer and training, we are here to help you every step of the way.

Your identity partner for the long-term

Identity management that "just works" can set your enterprise free. Suddenly, people can find and log in to their applications, and get work done. Tension between security concerns and productivity simply falls away. IT staff stop spending their time dealing with lost passwords and repetitive tasks. Instead, they can consult with the business and say "yes" to innovative new solutions, onboarding and securing them in record time.

With Okta Professional Services at the helm, your cloud aspirations are absolutely within reach.
