Streamline and Secure Collaboration with Box, Slack, and Okta
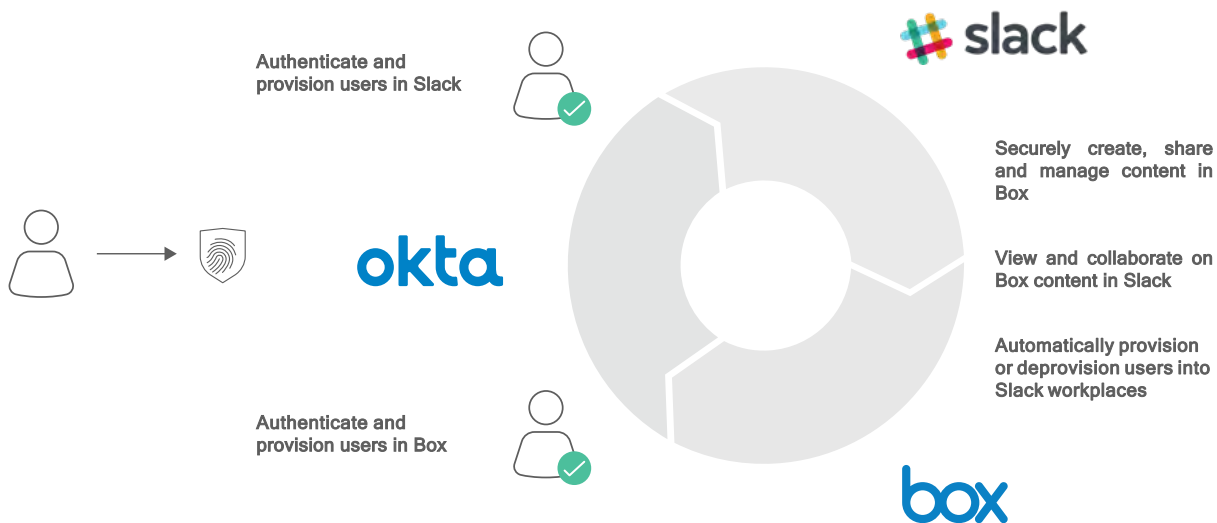

Best-of-breed productivity suite allowing you to move at the speed of business.

The Challenge

- As organizations evolve in the digital age, employees demand maximum flexibility and convenience, with 24/7 access to all resources both on and off premises

- Employees, customers, and partners need to be able to collaborate efficiently from anywhere, on any device, with complete security and governance

- End users waste time and productivity as they navigate an excess of content, too many tools, and unclear communication

The Solution

Together, **Box, Slack, and Okta** provide a best-in-class solution for forward-thinking identity management, content management, and workplace collaboration that both users and IT love.

Authenticate and provision users in Slack

okta

Authenticate and provision users in Box

#slack

Securely create, share and manage content in Box

View and collaborate on Box content in Slack

Automatically provision or deprovision users into Slack workplaces

box

- **Box** makes it easy to centrally manage all your organization's content, giving users and teams a secure way to access, share and collaborate on content from any device

- **Slack** is a collaboration hub that brings communication, content and tools together in channels, helping teams collaborate and be more productive

- **Okta** provides secure access and provisioning via single sign-on (SSO) and multi-factor authentication (MFA)

Scalability Enterprise-Grade Security Enhanced Productivity
Enhanced Productivity

Reduce friction and spend less time communicating context and searching for the right content to get work done quickly and easily.

- Create rich user profiles immediately upon adding new users to Active Directory or an HR system by instantly provisioning them to Box and Slack leveraging a number of user attributes

- Enable users to seamlessly collaborate on content across teams, internally and externally

- Create an organized, scalable file structure for each user; leverage pre-existing groups from Okta and other systems such as Active Directory so users can easily share folders and collaborate

Scalability

Automatically provision and deprovision users on teams and workplaces to make adoption easier.

- Easily deprovision departing employees' content and channels, so none of the data gets lost, and free up licenses

- Enable administrators to automatically provision users on a per-workspace or user group basis via the Okta integration with Slack Enterprise Grid so employees can get added to the channels they need right away, or removed when they leave the organization

Enterprise-Grade Security

Ensure sensitive information is organized and accessible only to those who need it, and have the approval to use it.

- Give employees access to Slack and Box via single sign-on, including on mobiles

- Automatically detect unusual log-ins with intelligent and context-aware security that can prompt for strong 2-factor authentication, if needed

- Extend advanced security and governance controls to all your content, including customer managed encryption keys, in-region data storage, data retention and support for defensible eDiscovery, including legal holds

- Slack includes interfaces at the organization level for managing security, policy, compliance, and integrations, in a uniquely distributed administration model

60%	of workers think the collaboration tools IT provides aren't useful [IT Business Edge]
48%	of time spent in meetings, sending, sorting and responding to email, administrative tasks, and more
20%	of time each week gathering or accessing information
