Identity Platform for Web and Mobile Applications

Launch a better, more secure product faster

Authentication and user management are core capabilities that every application needs, and prerequisites for security and user adoption. Yet implementing a modern, secure identity and access framework that delivers

integration across systems can be a challenge. The Okta Platform provides a complete identity layer for any application.

Use Cases for managing customers, partners and users:

Secure User Management
Authentication, user management, and sign-on policy for any app.

Connect to Distributor & Supplier Identities
Share information with distributors and suppliers while allowing partners to manage identities independently.

MFA for your App
Add multi-factor authentication to your app.

Partner or Customer SSO
Connect several apps with one username, one password, and one session.

Single Customer Profile
Create one consolidated user profile, and analyze user engagement.

Enterprise Federation for your Service
Implement efficient, standards-based, enterprise federation at scale.

About Okta

Okta is the foundation for secure connections between people and technology. By harnessing the power of the cloud, Okta allows people to access applications on any device at any time, while still enforcing strong security protections. It integrates directly with an organization's existing directories and identity systems, as well as 4,000+ applications.

Because Okta runs on an integrated platform, organizations can implement the service quickly at large scale and low total cost.

Thousands of customers, including Adobe, Allergan, Chiquita, LinkedIn and Western Union, trust Okta to help their organizations work faster, boost revenue, and stay secure.
